Operation Microchip Predators

Dear Governor Crist

Your record of strength against crime and in support of the safety of our children is extremely important to our future. Recently, the Wisconsin State Legislature adopted a new state, section 301.48, titled "Global Position System Tracking and Residence Requirement for Certain Sex Offenders." This ground-breaking legislation is designed to prevent sexual predators from re-offending by requiring tracking by GPS implants, for life.

I am contacting you because of your deep dedication to the fight against crime and sexual predators.

We are in the process of gathering signatures on a petition in support of this legislation to recommend that the State of Florida also adopt a similar law to help not only our state but to set an example and lead the way for other states; however we would like to take what Wisconsin has done a step further by adding the following two objectives.

1. A Zero Tolerance policy - this will help to reinforce to sexual predators or offenders that we will prosecute all or any to the full extent of the law, thereby helping to prevent and all predators who may be thinking of committing these acts.
2. Utilizing the current technology at security checkpoints and store checkpoints, have the microchip registered in a central database that would set off a silent alarm or announcement to alert loss prevention teams that there is a sexual predator on premises; this could apply to movie theaters, malls, sporting events / locations, etc.

I am including a copy of the Wisconsin law with this letter, we request that you consider supporting a similar proposal, with the incorporation of our 2 additional objectives noted above, here in Florida. This will provide a more cost efficient solution which will help in protecting our children 7 days a week, 24 hours per day by allowing the state to know where all sexual predators are located at any given time.

Sincerely,
Enrique G. Martinez, aka Henry Martinez
